Abstract	2
Contents	3
List of Figures	9
Acknowledgements	12
Author's declaration	13
1 Intro	15
1.1 Bayes' Theorem: Foundations and Applications	15
1.1.1 Statement of Bayes' Theorem	15
1.1.2 Bayesian Inference for Parameters	15
1.1.3 Posterior Proportionality	16
1.1.4 Applications of Bayes' Theorem	16
1.1.5 Interpretation and Practical Implications	17
1.2 Conjugacy and Conjugate Priors	17
1.2.1 Definition of Conjugacy	17
1.2.2 Advantages of Conjugacy	17
1.2.3 Examples of Conjugate Priors	18
1.2.3.1 1. Binomial Likelihood with Beta Prior	18
1.2.3.2 2. Normal Likelihood with Normal Prior	18
1.2.3.3 3. Poisson Likelihood with Gamma Prior	18
1.2.3.4 4. Multinomial Likelihood with Dirichlet Prior	19

1.2.4	Non-Conjugate Priors	19
1.2.5	Relevance to This Thesis	19
1.2.6	Dirichlet-Multinomial Distribution and Conjugacy	19
1.2.6.1	Prior Distribution: Dirichlet Distribution	19
1.2.6.2	Likelihood: Multinomial Distribution	20
1.2.6.3	Posterior Distribution: Dirichlet Conjugacy	20
1.2.6.4	Application to Forecasting	21
1.2.6.5	Relevance to This Thesis	21
1.2.6.6	Posterior Distribution	21
1.3	Probability Scoring	23
1.3.1	Definition of Probability Scores	23
1.3.2	Relevance of Probability Scores	23
1.3.3	Proper and Strictly Proper Scoring Rules	24
1.3.4	Mathematical Derivations of Scoring Rules	24
1.3.4.1	Logarithmic Score (Log Score)	24
1.3.4.2	Brier Score	25
1.3.4.3	Spherical Score	25
1.3.5	Examples of Probability Scoring in Practice	25
1.3.6	The Kelly Criterion and Its Relationship to the Log Score	26
1.3.7	Lindley and the Geologist: Motivating Forecast Aggregation	26
1.3.8	Summary	27
1.4	Bayesian Two-Sample Hypothesis Testing	27
1.4.1	Problem Statement	28
1.4.2	Bayesian Framework	28
1.4.2.1	Model Under H_0	28
1.4.2.2	Model Under H_1	28
1.4.3	Nonparametric Priors: Pólya Tree Prior	28
1.4.3.1	Prior Specification	28
1.4.3.2	Posterior Under H_0	29
1.4.4	Bayes Factor for Model Comparison	29
1.4.5	Consistency and Sensitivity	29
1.4.6	Applications and Simulations	29
1.5	Aggregators and Aggregation Functions	30
1.5.1	Definition of Aggregation Functions	30
1.5.1.1	Properties of Aggregation Functions	30

1.5.2	Types of Aggregation Functions	30
1.5.2.1	Arithmetic Mean	30
1.5.2.2	Weighted Mean	31
1.5.2.3	Median	31
1.5.2.4	Geometric Mean	31
1.5.2.5	Logarithmic Aggregator	31
1.5.3	Aggregation in Probabilistic Forecasting	32
1.5.3.1	Linear Pool	32
1.5.3.2	Logarithmic Pool	32
1.5.4	Applications of Aggregation Functions	32
1.5.5	Challenges in Aggregation	32
1.6	Change Point Detection	33
1.6.1	Definition of Change Points	33
1.6.2	Properties of Change Point Detection	33
1.6.3	Types of Change Point Detection Methods	33
1.6.3.1	Parametric Methods	34
1.6.3.2	Non-Parametric Methods	34
1.6.3.3	Bayesian Methods	34
1.6.3.4	Machine Learning Approaches	34
1.6.4	Applications of Change Point Detection	35
1.6.5	Challenges in Change Point Detection	35
1.7	Betting Markets and Prediction Markets	35
1.7.1	Definition and Purpose	35
1.7.1.1	Differences Between Betting and Prediction Markets	36
1.7.2	Key Players and Roles	36
1.7.3	Payoff Structures	36
1.7.3.1	Binary Payoffs	36
1.7.3.2	Continuous Payoffs	37
1.7.4	Mathematical Framework	37
1.7.4.1	Market Clearing and Equilibrium	37
1.7.4.2	Information Aggregation	37
1.7.4.3	Scoring Rules and Payoffs	37
1.7.5	Prominent Examples	38
1.7.5.1	Betfair	38
1.7.5.2	Polymarket	38

1.7.5.3	Kalshi	38
1.7.6	Applications of Prediction Markets	38
1.7.7	Challenges and Limitations	38
1.8	Wisdom of Crowds and Its Relevance in Popular Culture	39
1.8.1	Theoretical Foundation	39
1.8.2	Popularization of the Wisdom of Crowds	39
1.8.2.1	James Surowiecki's <i>The Wisdom of Crowds</i>	39
1.8.2.2	Nate Silver's Contributions	40
1.8.2.3	Philip Tetlock's Work on Superforecasting	40
1.8.3	Applications of the Wisdom of Crowds	41
1.8.4	Challenges and Limitations	41
1.8.5	Bruno de Finetti: Subjective Probability and Exchangeability	41
1.8.5.1	Subjective Probability	41
1.8.5.2	Exchangeability	42
1.8.6	Leonard J. Savage: Decision Theory and Personal Probabilities	42
1.8.6.1	Subjective Expected Utility (SEU) Framework	42
1.8.6.2	The Role of Bayesian Inference	43
1.8.7	The Intersection of Savage and de Finetti's Ideas	43
2	Kairosis	44
2.1	Introduction	44
2.2	Methods	48
2.2.1	Deriving a distribution over change point locations	48
2.2.2	Parameter Selection	52
2.3	Results	55
2.3.1	Scoring aggregated forecasts	56
2.3.2	Performance Evaluation	57
2.3.3	Remarks on kairosis and crowd inaccuracy	61
2.4	Discussion	61
2.5	A worked example of computing the kairosis weighting function	63
2.6	Non-Probabilistic Questions	64
2.7	Sensitivity Analysis	66
3	Orderbook	69
3.1	Introduction	69

3.2	Background and Literature Review	71
3.2.1	Belief Elicitation in Prediction Markets	71
3.2.2	Market Microstructure and Order Book Dynamics	73
3.2.3	Bayesian Inference and Beta Distributions in Markets	74
3.2.4	Truncated and Censored Data Models	75
3.2.5	Polymarket and Prior Work	77
3.3	Data and Market Context	78
3.3.1	Polymarket Structure and Mechanics	78
3.3.2	Order Book Visibility and Examples	80
3.4	Modeling Framework	82
3.4.1	Latent Beliefs and the Beta Distribution	82
3.4.2	Filtering via Strategic Order Placement	82
3.4.3	Stage 1: Histogram-Based Beta Fit	82
3.4.4	Stage 2: Rejection Sharpening	83
3.4.5	Stage 3: Inverse Simulation to Recover Latent Beliefs	83
3.4.6	Summary	83
3.5	Estimation Procedure	84
3.5.1	Stage 1: Fitting the Filtered Belief Distribution	84
3.5.2	Stage 2: Rejection Sharpening	84
3.5.3	Stage 3: Inverse Simulation and Latent Recovery	84
3.5.4	Interpretation	85
3.6	Temporal Dynamics and Granger Causality	85
3.6.1	Variable Definitions	85
3.6.2	Model Specification and Estimation	86
3.6.3	Granger Causality Tests	86
3.6.4	Interpretation	86
3.6.5	Toy Illustration	87
3.6.6	Conclusion	87
3.7	Discussion and Conclusion	87
3.7.1	Summary of Contributions	88
3.7.2	Key Insights	88
3.7.3	Applications and Broader Implications	89
3.7.4	Limitations and Future Work	89
3.7.5	Conclusion	90

4	Trader Behavior and Strategy on Polymarket	91
4.1	Motivation and Overview	91
4.2	Data Collection and Preprocessing	92
4.2.1	Wallet-Level Trade Extraction	92
4.2.2	Game and Trade Alignment	93
4.2.3	Data Cleaning and Feature Engineering	94
4.3	Behavioral Signatures	95
4.3.1	Trade Directionality and Timing	95
4.3.2	Market Context Features	96
4.3.3	Derived Behavioral Metrics	97
4.4	Clustering and Trader Typologies	98
4.4.1	Feature Matrix Construction	98
4.4.2	Clustering Methodology	99
4.4.3	Cluster Interpretation and Labeling	100
4.5	Modeling Trader Reaction to Game State	101
4.5.1	Score Differential and Market Moves	101
4.5.2	Skellam-Based Signal Processing	103
4.5.3	Lagged Response and Predictive Behavior	103
4.6	Case Studies and Notable Wallets	105
4.6.1	High-Volume Traders	105
4.6.2	Edge-Timing and Opportunistic Behavior	105
4.6.3	Speculative vs. Informed Trading Patterns	106
4.7	Discussion	107
4.8	Conclusion	108
5	Conclusion and Future Work	110■
5.1	Summary of Contributions	110
5.2	Thematic Connections	111
5.3	Limitations	112
5.4	Future Work	112
5.5	Final Remarks	113
